[www.prosper.org.au/1m4](http://www.prosper.org.au/1m4)

## HISTORICALLY? HERE'S HOW

Value Capture helped build Melbourne's public transport network, financing parts of the:

- City Loop
- Glen Waverley line
- Upfield line
- Beaumaris tram route

In the 1920s the government even planned to use Value Capture to finance a Doncaster rail line. The Sydney Harbour Bridge would not have been built without VC.

Today, Value Capture financing is helping to build public transport in the Gold Coast, Perth, Hong Kong, Japan and the London CrossRail.

With this great track record, why aren't our politicians moving faster on the funding issue? All citizens should benefit from publicly funded infrastructure, not insiders.
